

Stark INTEGRATION

Long-Standing Commitment to quality service & support with in-house expertise.

Total Facilities Solutions Provider

HVAC Controls

Protective Systems
& Access Controls

CCTV & Surveillance

Power Management

Lighting Integration

Energy Management

Engineers

Architects &
Contractors

Building Owners

Solutions & Services

- Integration packages with customized dashboards
- Specification of technology with selection options
- Sequence of operations for optimized performance
- University Credits for Energy (CE)
- Sample drawings & sequences + review of control drawings and specifications
- Training on technology, products, protocols & programming for design consideration
- BACnet, Lon Best Practices, protocol training
- Data analytics & building intelligence with recommended action plans that extend building lifecycle

Totally change the way your buildings do business.

Stark's Integration team provides actionable insights to execute energy and operational strategies that solve business problems and maximize efficiencies. We work with you to build enterprise-wide solutions that connect building systems, gather data, and insights through master systems integration.

Building Automation

- Facility dashboards
- Energy Metering, Reporting, & Tracking
- Energy Management & Continuous Commissioning
- Performance Contracting & Energy Services
- Design Build Energy Services
- HVAC Controls
- Lighting Systems
- Temperature Controls
- Fault Detection Diagnostics

Security & Notification

- Access Controls
- Video Surveillance
- Mass Notification Systems
- Intrusion Detection
- Digital Message Boards
- Fire & Life Safety
- Vape & Chemical Detection

Facilities Services

- Service & Maintenance Plans
- 24/7/365 Emergency Service
- Predictive Reporting & Building Analytics
- HVAC Conditioning
- Infrared Camera/ Heat Signature
- Arc Flash Studies

Engineered Solutions

- Comprehensive Analysis
- Preliminary Energy & Utility Profiles
- Detailed Site Audits
- Transient Voltage Surge Suppression
- Power Factor Correction
- Uninterruptible Power Systems
