CRITICAL ENVIRONMENTS │ Industry Leading Design-Build Applications

Stark Tech leverages longstanding partnerships with end users, contractors, engineers, and developers to deliver on security, compliance, and quality control requirements. With more than 50 years of experience, our team can design a roadmap and customize solutions that address your immediate needs with future proofing technology that supports long-term goals and objectives. We pride our work on efficiency, risk management, coordination, and ownership.

COMPREHENSIVE PLANS FOR SUCCESS │ Design, Secure, Comply

Prefabricated & Modular Designs

Conception through completion design support & equipment solutions that reduce risk, improve safety, and ensure ISO compliance. All-inclusive including ceiling systems, wall units, power sources, air supply & treatment, flooring, and other specialized equipment.

Microgrids & Solar

Combination of renewable power integration, energy storage, & conventional power generation to ensure reliable and resilient power supply to meet the energy demands of the cleanroom.

Turnkey Design-Build

Single-source accountability for quality control, cost, schedule, and performance. Comprehensive designs from floor to ceiling with master systems integration and analytics.
