MASTER SYSTEMS INTEGRATION │ Unlock Productivity and Energy Efficiencies.

With a worldwide shift to digitalization and electrification through the complex IP-based internet of things (IoT), master systems integration plays an integral role in providing actionable insights and automation protocols designed to achieve energy efficiency goals.

Stark Tech works with building owners and operators to customize solutions that connect disparate technology systems including building management systems, power control and monitoring, protective systems, professional audio and visual technology, and integrated renewable energy systems into a single pane of glass for seamless communication.

TURN DATA INTO ACTION │ For Better Control Over Energy & Power Quality.

Building Controls & Automation

Customized building management solutions that blend building controls, IT technologies, and optimization protocols to achieve tangible, scalable results.

Power Monitoring & Management

Proactively monitor sensitive power equipment, primary electrical infrastructure, and backup power systems to ensure power quality control.

Protective Systems

Unified security technologies integrated with the building management system for an easy-to-manage platform for fast response and streamlined communication between stakeholders and emergency personnel.

Professional Audio/Visual

Customized user experiences designed to elevate facilities with high-performance audio/visual technology.

Integrate | Monitor | Control

Total Optimization | Starktech.com

SOLUTIONS THAT FUTURE PROOF YOUR FACILITY:

Building Controls & Automation

- ▶ Customized facility dashboards
- ▶ HVAC & temperature controls
- ▶ Smart lighting controls
- ▶ Mechanical systems integration
- ▶ Energy metering, reporting, & tracking
- ▶ Fault detection diagnostics

Power Monitoring & Management

- ▶ System monitoring
- ▶ Power reliability
- ▶ Asset management
- ▶ Power quality
- ▶ Event forensics

Protective Systems

- ▶ Access control
- ▶ Fire & life safety
- ▶ Intrusion detection
- ▶ Video surveillance & CCTV
- ▶ Public address/crisis management
- ▶ Vape & chemical detection

Professional Audio/Visual

- ▶ A/V system control & automation
- ▶ Audio monitoring & distribution
- ▶ Indoor/outdoor performance systems
- ▶ Wireless microphones
- ▶ Video presentation/digital walls

IMPROVE OCCUPANT EXPERIENCE |
Comfort, Safety, and Productivity.

No matter the industry, building visitors and occupants seek out positive user experiences. Whether it's a student, a patient, a spectator, or a traveler, the health of the building and the visitor experience can make the difference between a good impression and a bad one. Comfortable temperatures, proper lighting, and innovative technologies all contribute to recruitment and retention.

As master system integrators, Stark Tech integrates mechanical and electrical systems at enterprise, campus, and individual site bases for streamlined communication through a single pane of glass. Data pulled from the platform is used to deliver actionable, real-time insights that help reduce energy consumption and alert facility managers to inefficiencies within assets through fault detection and diagnostics.
