

## PROTECTIVE SYSTEMS | Enhance Safety Measures

Unify building security infrastructure and building management systems for faster, more efficient, and potentially life-saving decisions in the field.

## THE SMART SOLUTION FOR BUILDINGS AND IT

### Master Systems Integration

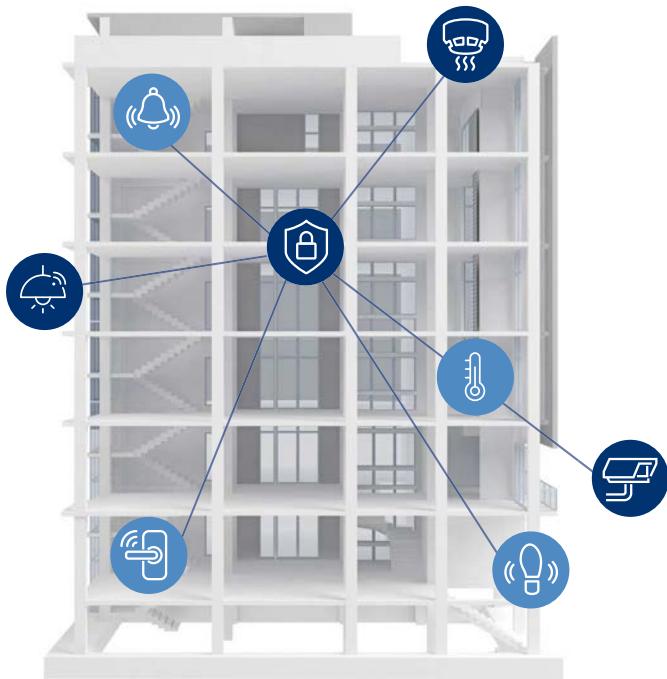

- Access Control
- Lighting Control
- HVAC, Building Automation
- Asset Key Tracking
- Intrusion Detection
- Elevator Integration
- Public Address
- Video Surveillance/ CCTV
- Biometrics, Wireless Locks
- VoIP Intercoms, Professional Audio Clock System
- Visitor Management
- Fire Detection and Alarm
- Parking Management, License Plate Recognition
- Mass Notification/Lockdown

Keep your building occupants safe with an easy-to-use interface that applies advanced levels of configurable, programmable logic to meet your building's unique needs.

One solution alone may not be enough. It takes active prevention, open and easy communication, and fast emergency response to keep building occupants safe and assets online. Through master systems integration, protective systems like access control, intrusion detection, wireless locks, and video surveillance can all communicate and interact with ease on a single pane of glass.

**IMPROVE COMMUNICATION**

**INCREASE HIGH-LEVEL SECURITY**

**REDUCE EMERGENCY RESPONSE TIME**

Stark Tech delivers secure, integrated IoT platforms that unify building security infrastructure and building management systems into an easy-to-manage platform.
