

Engineered Skid Solutions | Built in the USA. Backed by Local Expertise.

When you partner with Stark Tech, you're choosing more than engineered skid solutions—you're choosing a supply chain built for quality, reliability, and accountability. Every skid we deliver reflects our commitment to domestic manufacturing and skilled craftsmanship.

What Sets Stark Tech Apart

Made in Our Tonawanda, NY Facility

All skid assemblies are completed in Stark Tech's manufacturing facility in Tonawanda, New York—giving us full control over quality, scheduling, and execution from start to finish.

Union-Certified Craftsmanship

All pipe welding and pipe assembly are performed by Stark Tech personnel who are proud members of Local Union #22, ensuring experienced, certified workmanship on every project.

Locally Fabricated, Regionally Supported

Skid fabrication is completed by trusted local vendors throughout the Western New York / Buffalo region, strengthening our supply chain while maintaining tight quality oversight.

Total Optimization | Starktech.com

Domestic Vessels, Trusted Partners

All vessel fabrication is sourced from U.S.-based manufacturers, meeting domestic standards for quality, safety, and compliance.

Reliable Rotating Equipment

Compressors, blowers, and pumps are purchased from suppliers that assemble equipment in domestic shops, reducing lead times and improving serviceability.

Valves & Instrumentation—Made Here

Valves and instrumentation are sourced from vendors that assemble domestically, supporting consistency, traceability, and long-term reliability.

Why It Matters

- ▶ Reduced supply chain risk
- ▶ Faster lead times
- ▶ Higher quality control
- ▶ Support for American made manufacturing
- ▶ Confidence in compliance and performance
